
CNMI Quarterly Economic Indicators

January - March 2001

Department of Commerce
Commonwealth of the Northern Mariana Islands

MESSAGE FROM THE SECRETARY

I am pleased to release this ninth issue of a series depicting the social and economic conditions of the Commonwealth of the Northern Mariana Islands (CNMI) on a quarterly basis.

This publication is made possible by data researched and tabulated under the Central Statistics Division of the Department of Commerce and many other CNMI Government Departments and Agencies as well as other private organizations. We owe them a word of gratitude.

Please forward any comments and suggestions on this publication to my office. We are committed to providing you, the public, businesses, and leaders of the CNMI this quarterly issue of our Economic Indicators. We have worked hard to put together this ninth issue and we hope to add more information in the next issues.

FRANKIE B. VILLANUEVA
Secretary of Commerce

How the CPI can help us measure Price Changes.

The main purpose of a consumer price index (CPI) is to measure changes in prices of goods and services that a reference population (consumers) acquire, use, or pay for consumption.

The CPI calculations are based on a “BASE” year. In the case of the CNMI, the “BASE” year of our CPI is the third quarter of 1977 (1977.3), and our CPI shows the price increases compared to that year. Therefore a CPI of 270.1 for the first quarter of 2001, means that there was an average of 170.1% price increase for all items since the third quarter of 1977 till the first quarter of 2001 (2001.1); A span of about 25 years. While this number is intriguing, it is of course not realistic to compare prices to 25 years ago. A more realistic approach would be to compare the 2001.1 prices to its previous quarter prices, 2000.4 or its previous year quarter (2000.1). Table B shows that the overall prices in 2001.1 dropped by 1.10% compared to the last quarter (2000.4). The most significant drop was in Food, followed by Health and Recreation, and then Transportation. However, compared to the same quarter last year (2000.1), we experienced an overall .97% increase in prices mainly because of a hefty increase of 9.39% in the Health and Recreation area.

Table B. Consumer Price Index Percentage Comparison For Five Selected Groups

(1977.3 = 100.0) COMMODITY GROUP		Comparison of the 2001.1 CPI to the Previous Quarter, and Year			% Change in CPI in 2001.1 from	
		% Weight	2000.1	2000.4	2001.1	2000.1
ALL ITEMS	100%	267.5	273.1	270.1	0.97%	-1.10%
Food	49.25%	206.1	201.7	196.1	-4.85%	-2.78%
Housing	19.50%	218.2	213.1	214.4	-1.74%	0.61%
Apparel & Upkeep	9.10%	221.1	220.1	220.1	-0.45%	0.00%
Transportation	8.30%	326.7	341.7	340.9	4.35%	-0.23%
Health & Recreation	13.85%	550.4	604.9	602.1	9.39%	-0.46%
